- [Sudan](#)
- [Swaziland](#)
- [Tanzania](#)
- [Yemen \(NEW\)](#)

- [Zimbabwe](#)

Antimalarial recommendation maps are being added to TravelHealthPro as an ongoing project. Remember: You can click on to the maps to expand them (an enlarged image opens in a new window). The information should be used alongside the text describing the risk areas and recommendations in the 'Risk Areas' section.

The maps reflect the recommendations of the Public Health England Advisory Committee on Malaria Prevention (ACMP) [Guidelines for malaria prevention in travellers from the UK](#).
