Tuberculosis Green Book updated chapter

The tuberculosis chapter in the Green Book (Immunisation against infectious disease) has been published

Public Health England has published updated information and guidance on tuberculosis in the Green Book ([Immunisation against infectious disease: Tuberculosis. Chapter 32](#)).

This revised chapter includes :

- information of the licensed BCG vaccine available in the UK
- indications for BCG vaccine for those travelling for more than three months to a country where the annual incidence of TB is 40/100,000 or greater and/or where the risk of Multi Drug Resistant-TB (MDR-TB) is high

For specific information for individual countries please go to our [Country Information pages](#).

Health professionals can subscribe to the PHE [Vaccine Update](#) to keep in date with current UK vaccine recommendations.
