Public Health England post-exposure rabies treatment guidance published

Updated guidelines on rabies post-exposure treatment

Public Health England has published updated detailed [guidelines on rabies post-exposure treatment](#).

This includes updated guidance on

- clarifying the risk assessment of possible bat exposures and confirmed rabid animals.
- pet travel when the UK leaves the European Union.
- rabies vaccines and immunoglobulin compatible with the UK schedule.

For specific information for individual countries please go to our [Country Information pages](#).
