Updated 'Green book' typhoid chapter

The typhoid chapter of immunisation against infectious disease has been updated

Updates have been made to the [typhoid chapter in the 'Green book'](#) Immunisation against infectious disease'.

- The minimum age for Vivotif oral typhoid vaccine has been lowered to 5 years in line with the Summary of Product Characteristics [1, 2].
- Updates have been made to the content on epidemiology including a reminder on the development of antibiotic resistant strains of typhoid and the need to check up to date country specific recommendations for travellers.
