Yellow fever vaccine for travel to risk areas: accessing yellow fever vaccine

Information for travellers on yellow fever vaccine availability

Yellow fever (YF) vaccine is only available at designated Yellow Fever Vaccination Centres (YFVCs) in the UK. We are hearing reports that supplies of YF vaccine are limited in some places.

If you are unable to access YF vaccination from your preferred health care provider, you should contact an alternative YFVC.

NaTHNaC has a [searchable list of YFVCs in England, Wales, and Northern Ireland](#) (and elsewhere in the UK) which you can use to identify a centre.

We recommend you contact the centre by telephone first to ensure YF vaccine is available.
